## How to play Chinese Craps - The Basics

Also known as Big and Small, Sic Bo is an ancient Chinese game that can be intense or fun depending on how you want to play.

### What is the objective of the game?

To correctly predict what will show face-up on the three dice after they have been tumbled.

### How do I play?

1. Place a bet on the combinations of the dice by placing gaming chips in the different betting areas on the table. Every possible bet appears on the table layout, along with the odds for each bet.

2. You can bet on the following:

The total value of all three dice.

Doubles (whether two same numbers will appear).

Trebles.

Large and Small. (eleven and over, ten and under )

3. When all bets have been placed, the dealer will announce "no more bets". The dice are then tumbled by one of the players. The dealer will then take off all losing wagers and pay out the winners. No more bets can be placed until the dealer has finished paying out.
