How to play Wheel Of Fortune - The basics

More of a spectacle than a serious game, the wheel-of-fortune is great for guests to have a flutter without getting too involved!

What is the objective of the game?

The wheel-of-fortune is a large vertical segmented wheel. The segments all display a value. These segments are all represented on the playing area on the table below.

Like roulette, players bet which segment the pointer will align with when the wheel is spun by placing chips on the playing area. The value of the segment equates to the odds paid out if they win.
